Importance: High

Chris,

Would you please authorize the following RUSH search?

Reason: Overdue amended on SPDI case (newly transferred to me).

Thanks

STIC,

Serial Number: 09/866034

Please search SEQ ID NO: 2 in its entirety, and the portion (unidentified by applicants) of SEQ ID NO:1 that encodes SEQ ID NO:2 (i.e. find an open reading frame that encodes 278 amino acids, and search that).

-pending

-issued

-commercial

Thanks.

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, **.nrpm** and **.nrpn**  
Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, **.rapm** and **.rapn**

***The Pending database search results should not be left in the case because they contain data that is confidential.***
